

For many years DYRL fans in the West had to contend with butchered English-dubbed version of DYRL known as Clash of Bionoids.

Dedicated Macross fans has since come up with various of English subtitled DYRL available on many online vid download sites, whose works later copied unscrupulously by Hong Kong DVD pirates in selling pirated DYRL DVDs with complete English subs.

Nevertheless, dedication of Macross fans never ceases to amazed me. In the continuation of the spirit by Macross fans for Macross fans, their hardwork & selfless contribution has bring us perhaps the ONLY COMPLETE VIABLE unofficial English dubbed DYRL to the masses. The fact they managed to get Cristina Vee, an up & coming anime & game voice over artist onboard the project as Lynn Minmay is very compelling!
